

# Annual Review 2006

---

The Financial Information appearing in this review is a translation of the original Japanese text into English and is based on generally accepted accounting standards and practices in Japan.

**Forward-Looking Statements**

Forecasts of future performance contained in those statements are based on Riso Kagaku Corporation's current expectations, estimates and assessment of the markets in which it operates. A number of factors, many beyond the Company's control, could cause actual results to differ materially from the forecasts contained in these statements.

## To Our Shareholders and Investors

I would like to thank all shareholders and investors for your continued support. It is with great pleasure we present the following Annual Review 2006.

In fiscal 2006, ended March 31, 2006, the second year of the Riso Group's (hereafter "RISO") medium-term management plan, "Riso Vision 07," (see page 1), sales in the domestic and overseas digital duplicating business decreased and fell short of planned targets. In contrast, the inkjet business continued to achieve steady growth, posting an overall sales increase for the fifth consecutive year. Operating income declined for the second year running due to sluggish growth in gross profit on the back of a decline in the average sales price of printers and an increase in selling, general and administrative expenses.

During the fiscal year under review, RISO carried out a two-for-one stock split. Dividends for the year-end were thus set at ¥30.00 per share compared with ¥60.00 in the corresponding fiscal 2005 period.

In fiscal 2007, the final year of our medium-term management plan, we will conduct business operations placing specific emphasis on the following designated high-priority issues: "Increasing market share and improving profitability in the digital duplicating business," "Accelerating sales of the ORPHIS (RISO) HC series," "Reorganizing operations of the U.S. subsidiary," and "Accelerating new product developments and advancement of new business projects."

I would like to ask shareholders and investors for your continued support and encouragement in these endeavors.

June 2006

Akira Hayama  
President & CEO

# Medium-term Management Plan “Riso Vision 07”

To expand profit in our core digital duplicating business and establish a foundation for growth within our new inkjet printing business, RISO is currently promoting “Riso Vision 07,” a medium-term management plan set for completion by the fiscal year ending March 31, 2007.

## Basic Policies

- 1. Accelerating new product development and strengthening development system**
- 2. Making challenges for further expansion of digital duplicating business**
- 3. Establishing a new inkjet printing business**
- 4. Building the production and distribution system enabling low operation cost and inventory level**
- 5. Fostering human resources capable of leading our future growth**
- 6. Operating business in compliance with the law and consideration of the environment**

## Activity Targets

### • Research & Development Division •

Promoting new product development  
Strengthening concurrent engineering capabilities

### • Sales Divisions (Domestic and Overseas) •

Strengthening core business  
Creating new market through ORPHIS (RISO)  
HC5000

### • Manufacturing Divisions •

Strengthening overseas manufacturing system  
Working toward tightening inventories

### • Head Office •

Fostering and developing human resources  
Achieving thorough compliance

# Pursuing Innovation from Various Perspectives of Business Operation

Akira Hayama, President & CEO

**RISO is currently promoting its “Riso Vision 07” medium-term management plan designed to take the Group through fiscal 2007. President & CEO Akira Hayama explains RISO’s current status and future efforts.**

## Current Status of “Riso Vision 07” Medium-term Management Plan

Under the plan “Riso Vision 07,” we are undertaking measures to expand sales in the core digital duplicating business and establish a foundation for growth in our new inkjet printing business.

As of the end of March 2006, the second year of the three-year, medium-term management plan, we achieved the desired steady growth in the inkjet printing business. This was centered mainly on the domestic market and enabled us to achieve targets set out in the plan. On the other hand, however, sales in the mainstay digital duplicating business decreased as a result of stagnated growth in the domestic market as well as those of developed countries we operate in. In regard to our drive to accelerate development of new products and strengthen the strategies under which such products are fostered, we are achieving steady results through introducing new products that include our new one-pass two-color printer.

RISO has worked solidly to accomplish the numerical targets of its medium-term management plan, which aims for consolidated net sales of ¥100 billion and an operating income margin of 10% by the end of fiscal 2007. Despite all-out attempts, however, these targets are proving difficult to achieve amid a decline in sales of the digital duplicating business. In the current fiscal period, ending March 31, 2007, we have decided to keep the basic policies of “Riso Vision 07” in place and aim to achieve growth through increasing market share and improving profitability in

the digital duplicating business and focusing on expanding sales of the ORPHIS (RISO) HC series.

In regard to individual measures to be undertaken in relation to these issues, please refer to the following sections.

### Expansion of Digital Duplicating Market through Application and Product Development

Office environments in developed countries are changing rapidly in terms of quality, with increased installation of network printers becoming prominent alongside a rise in demand for color printing applications.

Amid this environment, I believe demand for digital printers will remain high. The global market scale of the printer business, which is worth an estimated ¥10 trillion, still yields great potential. For this reason, I believe RISO can expand sales in this segment through application and equipment development that meets the continually evolving and discerning needs of customers.

The RISOGRAPH MZ series of one-pass two-color printers launched in 2005 is receiving overwhelming support from customers seeking convenient two-color printing. This product developed for office use is a world first, and remains the only one of its type. It is gaining steady ground and has spurred the creation of a new market. This proves that there are still untapped areas in the digital duplication market, and we will thus undertake further efforts to expand markets through cultivating customers who desire our products and providing solutions to meet their needs.

One-pass two-color printer RISOGRAPH MZ770

### ORPHIS—A Driving Force for Growth

The ORPHIS series concept of “low running cost, high-speed, full-color printer” is beginning to gain acceptance in the market two years’ after being launched. Favorable progress in building the domestic sales channel has enabled the inkjet printing business to represent approximately 10% of RISO’s overall sales.

To advance sales of ORPHIS and further bolster the domestic market, in May 2006 we launched a new count charge system featuring low introduction costs. Through such undertakings, we will proactively propose solutions to meet the various needs of customers and elevate sales in the Japanese market.

High-speed color printer ORPHIS (RISO) HC5000 HG

## Fundamental Reform of U.S. Market Strategy

In the overseas business, augmenting sales capabilities in developed countries, especially in the United States, is a major issue. Up to now, the focus of the U.S. digital duplicating business has been primarily on schools. However, along with the full-scale introduction of ORPHIS (HC) series, demand from the private sector is expected to widely increase. Accordingly, we will carry out measures to develop new sales channels as a means of expanding our U.S. customer base. In fiscal 2007, we will focus specifically on strengthening management and restructuring sales channels geared toward accomplishing a “reorganization of operations at our U.S. subsidiary.”

## How to Best Pursue Corporate Social Responsibility—RISO’s Concept

A company is not only a commercial enterprise, but also a corporate entity that serves as a member of society. This is a concept I am continually mindful of.

In its medium-term management plan, RISO upholds a basic management policy of conducting business in compliance with the law and in consideration of the environment. Compliance at RISO entails more than merely abiding by the law and other regulations, but also aims to take firm action from an ethical and moral stance. Accordingly, we are pursuing thorough compliance through the development of the Compliance Handbook for employees and carrying out employee training via e-learning and other methods.

As for environment endeavors, the *Environmental Report* that has been published annually until last year was revamped as the *Sustainability Report*. This more effectively verifies the impact of RISO’s environmental activities in a quantitative manner.

## Dividend Policy and Message to Shareholders

In response to shareholder expectations, RISO is endeavoring to expand income and continuously aiming to improve corporate value.

Our basic policy for earning distribution is to allocate an appropriate portion of earnings for dividends in accordance with business results while retaining the remainder to strengthen our corporate structure. Following this basic policy, we will strive to maintain stable dividends distribution well into the future.

During fiscal 2006, RISO declared a year-end dividend of ¥30.00 per share, which, taking into account the Company’s two-for-one stock split that came into effect from November 18, 2005, is equivalent to the amount announced for the prior fiscal term. Further, we intend to utilize retained earnings to enhance operating results through improvements to the balance sheet, capital investment as well as R&D.

RISO will pursue innovation from various perspectives of business operations in order to shift its business structure from a “manufacturer specializing in digital duplicating” to a “specialty company that provides original print solutions in the digital duplicating and inkjet printing fields.”

I would like to ask shareholders for your unwavering support and encouragement in these endeavors.

### Launch of ORPHIS (RISO) HC5500 Leads to Enhanced Printing Speed of 120ppm

In November 2005, RISO launched the ORPHIS (RISO) HC5500 printer as a new model in its high-speed color printer series. The new model has further improved efficiency by raising print speed to 120ppm\* (single page). Significant advances have also been made in terms of paper feeding versatility for such materials as thick paper documents and envelopes. Additionally, data sent to the HC5500 is SSL encrypted, thereby significantly enhancing document security management.

Furthermore, used in conjunction with our new high-speed RISO Scanner HS2000, which is available as an option and standard equipped with a duplex auto feeder, the HC5500 realizes quick and easy dual-sided color copying.

This series has been designed from an environmental perspective and is compatible with the International Energy Star Program as well as the Law on Promoting Green Purchasing.

ORPHIS (RISO) HC5500 and the optional RISO Scanner HS2000

### Actively Promoting RISOGRAPH and ORPHIS at Various Exhibitions

In order to introduce our products to new customers, RISO exhibits at various industry-related fairs and also hosts its own exhibitions.

In addition to demonstrations using the RISOGRAPH digital printer and our ORPHIS high-speed color printer to present to visitors the advantages of these products in terms of print speed, low running cost and image quality, we also actively introduce solutions based on respective print environments and application needs.

In fiscal 2006, we held Special Exhibitions nationwide in commemoration of the 25th anniversary of the original RISOGRAPH's launch. Along with exhibiting RISO's products, including the new RISOGRAPH and ORPHIS models, we provided proposals and demonstrations and introduced case studies of actual-use of our products in the marketplace.

In this respect, we will continuously propose print solutions to meet customer needs.

Special Exhibition, Century Hyatt Tokyo (February 2006)

## Business Environment and Performance

In the term ended March 2006, the second year in the medium-term management plan, RISO focused on key issues such as expansion of the inkjet business, sales expansion of the one-pass two-color printer, R&D, engineering and production operation in pursuit of overall optimization, quality enhancement of management mind, and promotion of environment-conscious management and buildup of VCM (Value Chain Management) system.

With respect to the expansion of the inkjet business, we introduced to the market the ORPHIS HC5500, which boasts a faster printing speed of 120ppm and a finisher system equipped with stapling and punching functions, as an initiative to increase sales. We also stepped up advertising by televising commercials nationwide throughout the year, and actively exhibiting at exhibitions overseas.

With respect to an increase in the sales of the one-pass two-color printer, in aiming to boost sales to government and municipal offices as well as schools, we promoted this product to meet private requirements for leaflet use in Japan. We started to sell this product on a full-scale basis overseas from the term under review.

As to the promotion of environment-conscious management and buildup of the VCM system, we started a VCM (Value Chain Management) project for marketing and distribution as well as for manufacturing, and promoted the establishment of systems to achieve an inventory reduction through the continuous reform of production, sales and inventory.

As a result of these activities, net sales rose ¥2,439 million (2.9%) year-on-year to ¥87,601 million. This

was thanks to growth in sales of ORPHIS, the high-speed full-color printer, which offset a decline in domestic and overseas sales of RISOGRAPH.

In terms of results by geographical area, domestic sales expanded, supported by the favorable effects of the introduction of one-pass two-color printers and brisk sales of high-speed, full-color inkjet printers, despite a year-on-year decline of overall domestic consumable sales of digital printers. As a result, net sales including net sales of the real estate business and others increased 3.3% year-on-year to ¥46,431 million.

In the United States, sales showed slowing growth mainly due to a drop in the average selling price of digital printers and delays in setting up the ORPHIS sales channel. As a result, net sales dipped 0.4% year-on-year to ¥13,040 million.

In Europe, sales were lower than projected, a reflection of sluggishness in direct sales of our U.K. subsidiary and dealer sales of our subsidiary in Germany. However, our subsidiary in France achieved a steady rise in sales thanks to the introduction of ORPHIS. As a result, net sales rose 3.9% year-on-year to ¥17,802 million.

In Asia, sales of printers were lower than projected in China. In contrast, sales of consumables remained brisk. In Southeast Asia, sales of printers and consumables were also lower than projected targets. However, sales remained steady due partly to the effect of the introduction of ORPHIS. As a result, net sales rose 3.4% year-on-year to ¥10,327 million.

In terms of earnings, operating income declined 26.8% year-on-year to ¥4,812 million due to an increase in selling, general and administrative expenses, and recurring income

decreased 22.6% year-on-year to ¥4,552 million. Accordingly, net income declined 34.3% to ¥2,154 million versus the previous year.

During the term under review, the Company conducted a two-for-one stock split for its common shares. Additionally the Company declared a year-end dividend of ¥30.00 per share versus ¥60.00 in the previous term.

## Business Outlook for Fiscal 2007

RISO will continue to address important issues identified in “Riso Vision 07”, the Group’s medium-term management plan (for details, please refer to page 1).

In the RISOGRAPH business, we will endeavor to improve profitability through an increase in the sales of one-pass two-color printers, and strengthen our business structure.

In the ORPHIS business, we will boost sales by developing the newly initiated count charge system.

The business results of the subsidiary in the United States remain unfavorable. We will, however, endeavor to increase sales through by expanding demand for high-end machines such as one-pass two-color printer MZ series. We will also aim to reduce operating expenses through the integration and abolition of business units.

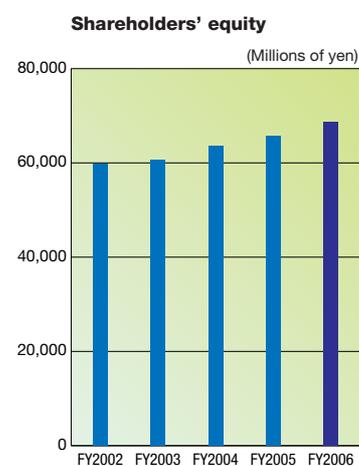

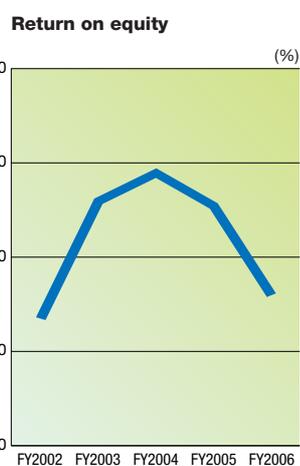

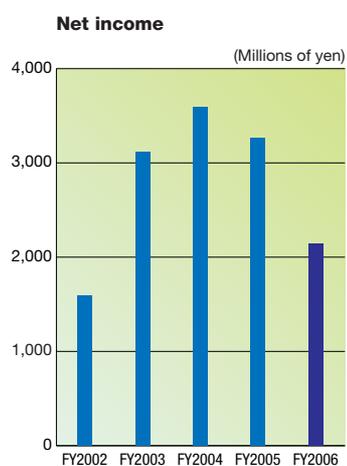

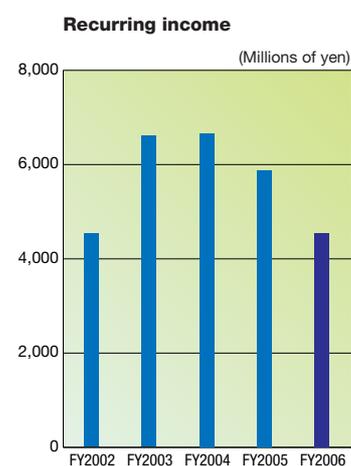

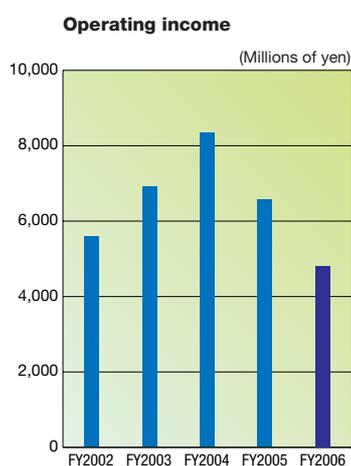

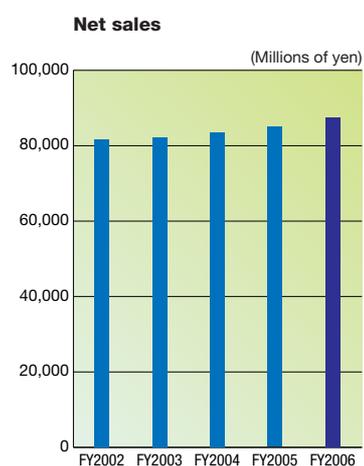

Turning to consider the business outlook for the next fiscal year, we estimate net sales of ¥89.9 billion (up 2.6% from the previous year), recurring income of ¥4.7 billion (up 3.2%) and net income of ¥2.9 billion (up 34.6%).

This business outlook is based on the assumption of foreign exchange rates of 110 yen/dollar and 135 yen/euro.

# Financial Highlights (Consolidated basis)

(Millions of yen)

Total	1,411

**Domestic**

RISO's sales network encompasses 15 sales departments and 48 sales branches as well as sales subsidiaries. Additionally, we provide technical support and develop supply systems for consumables throughout the nation to enable customers to use our products with assurance. Skills development programs for technical staff are carried out nationwide centering on the RISO Education Center.

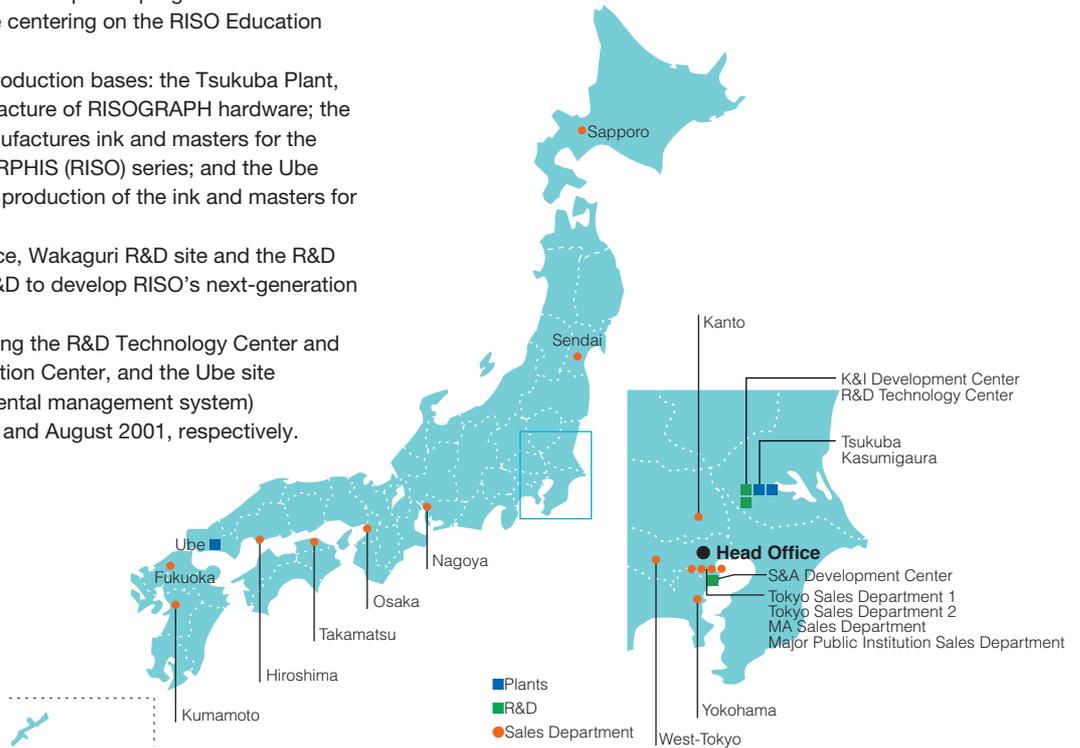

We have three domestic production bases: the Tsukuba Plant, which is engaged in the manufacture of RISOGRAPH hardware; the Kasumigaura Plant, which manufactures ink and masters for the RISOGRAPH and ink for the ORPHIS (RISO) series; and the Ube Plant, which handles the mass production of the ink and masters for the RISOGRAPH.

In addition to the head office, Wakaguri R&D site and the R&D Technology Center conduct R&D to develop RISO's next-generation products.

The Tsukuba site, comprising the R&D Technology Center and the Tsukuba Plant and Distribution Center, and the Ube site acquired ISO 14001 (environmental management system) certification in December 2000 and August 2001, respectively.
